

Staying Power

Resilience™ Wind Turbine Tray Cable

An innovation leader, Northwire offers Resilience™ Wind Turbine Tray Cables—the most flexible, rugged and technically advanced WTTC and low-voltage cables in the industry.

Northwire exceeds your requirements with design services and prototyping, expert guidance to navigate wind turbine standards, express delivery options and no minimum quantity or length requirements.

Guaranteed to perform in the harshest environments, Resilience Cables are engineered and constructed with high-performance stranding that's rated for constant flex per NFPA 79 (12.2.2). Resilience is your assurance of ultrareliable results in the wind turbine nacelle for low-voltage control, data, communication and exposed-run power applications.

Backed by Northwire's expertise, product quality and services, Resilience is built for unparalleled durability.

- Outstanding torsional and bend high-flex-life
- Proven to exceed Northwire's rigorous cold-bend test as low as -40°C
- Highly oil resistant (Oil Res I and II) and FT4 flame rated
- Performance tested for exceptional flexibility
- 6 to 18 AWG
- Available in 300V, 600V and WTTC-rated 1000V standard configurations
- Numerous options for customization to support evolving technology
- TC-ER (tray cable, exposed-run) rated and WTTC UL 2277 compliant
- Can ship in as little as five days with no minimum order length or quantity

Setting the Standard for Service and Quality

You'll be up and running quickly with Northwire's superfast delivery. And you'll keep running strong with rugged, technically superior cable that exceeds the demands—and the toughest environmental challenges—of any wind turbine application.

For complete information and samples, call or visit our website. Then power forward with the Resilience you can rely on from Northwire.
