Northwire specializes in the design and manufacture of custom cable and wire, retractiles, and complete connectivity solutions. With a focus on innovation, Northwire is always looking to the next horizon of customer challenges, bringing this new solution to the market with a number of features and benefits, including:

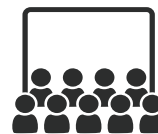

- Continuous illumination up to 200 meters with a concentrated light source
- Longer lengths available with additional connector/light sources combining cable lengths
- No added heat from the light source or illuminated cable
- Reduce trip hazards in low visibility areas
- Immediate visual recognition of proper cable connection or disconnection

Multiple Color Options Available

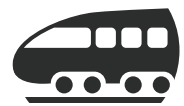

Possible Applications Include:

- Camera cable in low visibility environments
- Emergency or evacuation lighting
- Theme park or visual attractions
- Underwater diving application
- Sporting events
